

Introducing the MID2012 Intelligent Climate Controller

Optimal control for naturally ventilated spaces

Standard and optional controls features include:

- Temperature & CO₂ monitoring via LCD and a visual LED for CO₂ levels
- Control of UFH temperatures per zone with local user over-ride
- Weather monitoring via sensors or Modbus weather station
- Local over-ride facility for damper actuators, fans & solar fans
- Summer night cooling, heating & fire alarm interlocks
- Day/night and seasonal control settings
- Discreet at 87 x 86 x 32mm touch sensitive room controllers
- Automated & modulated window actuator control
- Intelligent master controller with natural ventilation control software
- **Modbus**[®] + **BACnet**[®] compatible with most BMS/BEMS systems

We provide a wide range of control systems, solutions and components to complement our range of natural ventilation products including the Windvent and X-Stream systems.
