

Introduction

Midtherm Flue Systems Limited is an independent British manufacturing company producing a wide range of flue and chimney products, along with associated components and services. Established for over 30 years, Midtherm products are installed worldwide including Poland, Oman, Libya, Hong Kong, China and the USA.

Quality Assurance

All products are controlled by a Quality Assurance System certified to ISO 9000.

Certificate No 5458

Product

Pellet Burning Flue chimney is manufactured with the following specification using the latest manufacturing and welding technology ensuring high quality and value for money.

316 inner 304 outer with 35mm insulation

Colours

To help integrate external flue sections into the appearance of a building, PBF can be stove enamelled or powder coated to any BS or RAL Colour code.

General Notes

1. An increase in fuel consumption, smoke in the building, evidence of sooting, difficulty in lighting, and staining around the appliance casing generally indicates a problem either with the appliance or a blockage in the system may have occurred.
2. Do not use cleaning chemicals on the flue.
3. Do not block or obstruct flue outlets or chimneys.
4. Do not cover an appliance.
5. Running appliances on constant low heat produces an increased level of condensation and may shorten the life of the product.

Midtherm flue and chimney products available for use on domestic appliances

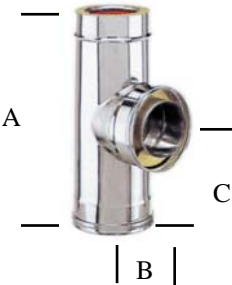

Single Wall 316 stainless steel ridged liner, available in 1mm and 22g
